PREFACE

This Directory contains details and descriptions of superannuation related statistics available from both private and public sector organisations. Superannuation related statistics cover the spectrum from broad economic and social aggregates to detailed market research. This Directory is intended to assist those interested in the subject of superannuation to locate relevant statistical information.

Since the first edition of the Directory was published in 1991, major changes have occurred in superannuation, such as the introduction of compulsory employer contributions as a result of the Superannuation Guarantee Charge. The *Superannuation Industry Supervision Act 1993* replaced the *Occupational Superannuation Standards Act 1987* as the legislative framework for the industry. Total superannuation assets at June 1991 were estimated at \$134 billion and have more than doubled to be almost \$304 billion in June 1997.

The ABS has endeavoured to include all sources of superannuation related data that are available to the public and which relate to the latest five years. Readers should advise the ABS of any data sources not included in this Directory as we plan to produce further editions as the need arises. If you are aware of any organisations which produce superannuation related statistics which have not been listed in this edition, or wish to comment on any other aspect of this publication, please contact Ms. Roberta Millucci on (02) 6252 7115 or refer to page 111 of this Directory.

I would like to thank the many organisations which took the time to complete their entries for this Directory.

While every reasonable effort has been made to ensure the contents of the Directory are reliable, the ABS accepts no responsibility for the accuracy of submissions from other organisations.

Dennis Trewin
Acting Australian Statistician

October 1997

HOW TO USE THIS DIRECTORY

You can locate an entry in two ways:

- by name of the contributing organisation
- by name of a particular publication.

Part A, the Contributor Index, lists contributors to the Directory alphabetically by organisation name.

Part C, ABS Services, lists the address details for the central and state offices of the ABS as well as a breakdown of the services that are available (e.g. bookshops, libraries, consultancies etc.).

Part D, the Product Index, lists all publications mentioned in the Directory, in alphabetical order of publication name.

The entries themselves are located in Part B, in alphabetical order of contributing organisation. The Directory uses a common set of headings to present the information about each statistical source. The contents applicable to each heading used in the Directory entries are as follows:

NAME OF ORGANISATION

Gives the name, address, main switch telephone number, facsimile number, Email address and Website of the disseminating organisation.

PRODUCT AND SERVICES

Provides name and title of the product and details of the forms in which the published statistics are available (e.g. publication, magnetic tape, computer printout, floppy disk, CD Rom) and the cost of obtaining the data in these forms. Note that all prices quoted are subject to change without notice and therefore should be used as a general guide only. If prices are determined on an individual request basis, 'price on application' is recorded here. All prices quoted are per copy unless specified otherwise.

CONTACT

About these statistics

Gives the name and position of the person in the organisation to contact for further information about the statistics, name of the section or subsection in which the contact person is located (if applicable) and the contact telephone number (if a direct line is available).

To purchase statistics

If the point of sale is different from the contact person for further information, a contact is noted here (e.g. bookshop, publicity department) and the contact telephone number (if a direct line is available).

BROAD DESCRIPTION

Offers a brief description of the contents of the statistics.

Purpose of data

Outlines the reason why the statistics are compiled and what they are used for.

DETAILED DESCRIPTION

Population

Gives information about the units of measurement used in the survey (e.g. funds, persons, households).

Superannuation data items

Describes in detail the information to be found in the statistics, generally including the units in which data are recorded (e.g. million dollars, number of fund members etc.), names of major groups of items, classifications used and cross-classifications available.

Some contributors have included a one sentence sample of recent information as an example of what can be drawn out of the statistics offered by them.

SOURCE

Discloses whether the data are collected directly by the organisation and the extent of reliance on data from other sources, if any.

METHOD OF COLLECTION

This category is intended to give relevant information about the collection methodology, e.g. method of data collection, proportion of market covered, reliability, sample size.

If the data are an administrative by-product, that fact will be noted here.

FREQUENCY

Provides the periods for which the data are available, e.g. quarterly, monthly, annually or irregularly.

TIMELINESS

Indicates how long after the reference period the statistics become available and/or are published.

HISTORICAL DATA

Reveals the period from which past data (time series) are available.

GEOGRAPHIC BREAKDOWN

Provides details of geographic area covered by the collection (e.g. Australia, States, Territories, capital cities, statistical divisions, statistical local areas, local government areas).

CONFIDENTIALITY AND AVAILABILITY

Outlines any restrictions placed upon access to the data.

Note: this category does not relate to copyright. It relates to whether any data which are collected cannot be released from the collecting organisation. For example, the *Census and Statistics Act* requires that statistics not be published by the ABS where it is possible for a third party to identify data supplied by a particular person or organisation. Confidentiality provisions also place restrictions on release of unpublished information.

UNPUBLISHED INFORMATION

Gives an indication of whether information beyond that described in the entry can be made available on request (subject to any confidentiality restrictions).

ASSIRT Tables

Dissemination media

Publication, floppy disk, magnetic/foreign tape, software package, modem transfer. Prices are available on application. A minimum fee of \$300.00 applies.

CONTACT

About these statistics and to purchase these statistics

Ms Carolyn Hampton
Manager, Funds Information

Telephone: (02) 9320 0299

BROAD DESCRIPTION

Data available on all publicly available retail and wholesale managed funds.

PURPOSE OF DATA

Statistics/research undertaken to enable assessment of investment merits of managed funds and for industry analysis. Data to track performance of managed funds.

DETAILED DESCRIPTION

Population

All publicly available managed funds.

Superannuation data items

Performance and fund research information on managers and the superannuation investment alternatives they offer.

SOURCE

Data are collected directly by ASSIRT from fund managers.

METHOD OF COLLECTION

Standardised industry forms plus specialised ASSIRT forms completed by managers to encompass all publicly available managed funds.

FREQUENCY

Daily, monthly and quarterly dependent on nature of data.

TIMELINESS

Maximum of 6 weeks after the reference period.

HISTORICAL DATA

Data are available from 1982.

GEOGRAPHIC BREAKDOWN

Australia.

CONFIDENTIALITY AND AVAILABILITY

Confidentiality is assessed on a case by case basis.

UNPUBLISHED INFORMATION

Unpublished information is available. Price on application.

NAME OF ORGANISATION

Association of Superannuation Funds of Australia (ASFA)

19/133 Castlereagh Street
SYDNEY NSW 2000

Switchboard: (02) 9264 9300

Facsimile: (02) 9264 2260

PRODUCTS AND SERVICES

Name/Title of product

Superfunds magazine.

Dissemination media

Publication \$10.00 per issue.

CONTACT

About these statistics and to purchase these statistics

Mr Chris Johnson
Research Assistant
Policy Department

Telephone: (02) 9264 9300

BROAD DESCRIPTION

Data collected on several superannuation topics from ASFA members.

PURPOSE OF DATA

To provide the superannuation industry with current trends and information.

DETAILED DESCRIPTION

Population

Fund Secretaries of superannuation funds.

Superannuation data items

Recent surveys undertaken include member choice and fund optional extras, transfer protocol, investments of superannuation funds, superannuation fund accounting practices and trustees of superannuation funds.

SOURCE

Data are collected directly by ASFA.

METHOD OF COLLECTION

Surveys are sampled and include funds who are members of ASFA. Survey participants cover all 4 types of superannuation funds i.e. public sector, corporate, industry and public offer funds.

FREQUENCY

3 to 4 times annually.

TIMELINESS

Statistical results are published in the ASFA magazine approximately 5-6 weeks after the reference period.

HISTORICAL DATA

Data are available from 1994.

GEOGRAPHIC BREAKDOWN

Data are available by fund type, State and size of fund.

CONFIDENTIALITY AND AVAILABILITY

Data are available in printed form in "Superfunds". Individual access to database is not authorised however individual requests for data from members can be arranged.

UNPUBLISHED INFORMATION

Unpublished information is available subject to confidentiality restrictions. Price on application.

Name/Title of product

1996 Census of Population & Housing (various catalogue numbers)

Dissemination media

Various publications, CD-Roms, floppy disks, magnetic/foreign tapes and software packages. Prices are available on application. Minimum fee of \$100.00 applies to Special Data Services.

CONTACT

About these statistics

Ms Gill McPadden
The Manager
Client Services and Statistical Support

Telephone: (02) 6252 7867

To purchase these statistics

Please refer to Part C — ABS Services of this Directory.

BROAD DESCRIPTION

The Census of Population and Housing is the largest statistical collection undertaken by the Australian Bureau of Statistics. The census measures key social and demographic characteristics of all people in Australia and the dwelling in which they live on Census night. A wide range of products and services are available from this collection.

PURPOSE OF DATA

Census information is used to support the planning, administration, policy development & evaluation of the activities of governments, business, researchers and other users. Census data may be used by the superannuation industry for forecasting purposes.

DETAILED DESCRIPTION

Population

Every individual and dwelling in Australia on Census night.

Superannuation data items

The Census data does not include information about a person's superannuation but does cover a wide range of demographic, social, housing, family and labour force data for all persons, families and dwellings in Australia on Census night.

This basic information assists researchers to analyse and forecast future trends. Information available includes details of the Australian population by:

- age
- main source of income per person/household (including superannuation)
- labour force status (employment status)
- educational qualifications
- employment industry.

SOURCE

5 yearly Census of Population and Housing.

METHOD OF COLLECTION

Data are collected and processed by the Australian Bureau of Statistics. Self enumerated by respondents Australia wide.

FREQUENCY

5 yearly.

TIMELINESS

First Release data is available approximately within 12 months of Census night. Second Release data is available approximately within 15 months of Census night.

HISTORICAL DATA

From 1911 at varying periods. From 1961 at five yearly intervals.

GEOGRAPHIC BREAKDOWN

Data are available for Australia, each State and Territory, Census specific areas (e.g. Postal Areas, Commonwealth & State Electoral Divisions, and Collection Districts).

CONFIDENTIALITY AND AVAILABILITY

Data are subject to confidentiality restrictions under the *Census and Statistics Act 1905*.

UNPUBLISHED INFORMATION

Customised census data are available on request. Price will vary depending on size and complexity of request.

PRODUCTS AND SERVICES

Name/Title of product

Assets of Superannuation Funds and Approved Deposit Funds
(Cat. no. 5656.0). Data is only available up to 30 June 1995.

Dissemination media

Data are also available on PC-AUSSTATS.

CONTACT

About these statistics

Mr John Carson
Assistant Director
Financial Accounts Section

Telephone: (02) 6252 7109

To purchase these statistics

Please refer to Part C — ABS Services of this Directory.

BROAD DESCRIPTION

Brings together data on the assets of the superannuation industry. Statistics are provided for various organisations involved with the investment of the assets of superannuation funds and approved deposit funds.

PURPOSE OF DATA

To provide information on the size and growth of superannuation funds as a source of savings and also used as an input to the production of the Australian National Accounts: Financial Accounts.

DETAILED DESCRIPTION

Population Details

100 largest superannuation and approved deposit funds; 80 fund managers and 29 of the largest life offices.

Superannuation data items

- Total assets of superannuation funds and approved deposit funds by type of asset.

- Assets of superannuation funds held in the statutory funds of Life Offices by type of asset.
- Total Assets of superannuation funds and ADFs held outside the Statutory funds of Life Offices by type of asset.
- Types of assets of superannuation funds and ADFs held outside the Statutory funds of Life Offices directly invested.
- Types of assets of superannuation funds and ADFs held outside the Statutory funds of Life Offices invested through fund managers.

SOURCE

Compiled from information collected by the ABS from its Survey of Balance Sheet Information and information collected by the Insurance and Superannuation Commission (ISC) for inclusion in its Quarterly Statistical Bulletin.

METHOD OF COLLECTION

The survey has now ceased; the last statistics were published in the June 1995 publication.

FREQUENCY

Quarterly up to June 1995.

TIMELINESS

Not Applicable.

HISTORICAL DATA

June 1988–June 1995.

GEOGRAPHIC BREAKDOWN

Australia.

CONFIDENTIALITY AND AVAILABILITY

Data are subject to confidentiality restrictions under the *Census and Statistics Act 1905*.

UNPUBLISHED INFORMATION

May be available on request, subject to confidentiality restrictions.

NAME OF ORGANISATION

Australian Bureau of Statistics

PO Box 10

PRODUCTS AND SERVICES

Name/Title of product

Australian National Accounts: Financial Accounts
(Cat. no. 5232.0)

Dissemination media

Publication \$22.00 per issue. Data are also available on floppy disk and as a Special Data Service. Price on application.

CONTACT

About these statistics

Mr Derick Cullen
Director
Financial Accounts Section

Telephone: (02) 6252 6244

To purchase these statistics

Please refer to Part C — ABS Services of this Directory.

BROAD DESCRIPTION

Quarterly estimates of flows of finance between the Life and Superannuation sector and other sectors; disaggregations of flows and levels of finance by sector and subsector.

PURPOSE OF DATA

Flow of funds statistics; national accounts capital account. The data published provides a quarterly statement of financial flows between the different sectors of Australia's economy.

DETAILED DESCRIPTION

Population

Estimates for all superannuation funds.

Superannuation data items

Transactions, valuation adjustments and levels of financial assets and liabilities and non-financial assets. Flow of funds data relating to superannuation (published 5232.0) differ from those published in the ISC Quarterly Bulletin in that they measure the flows as well as the levels of financial assets and liabilities, with adjustments to the flows for changes in the value of the assets and liabilities. Also, flow of funds estimates are consistent with data published in the Australian National Accounts, Balance of Payments and International Investment statistics. It is possible to disaggregate flow of funds data for the Life and Superannuation sector into sub-sectors (life offices, superannuation funds, friendly societies) while still retaining this consistency with the Australian National Accounts.

SOURCE

ABS Survey of Financial Information, Insurance and Superannuation Commission data and price deflators maintained by the industry.

METHOD OF COLLECTION

Analysis of information obtained from all three sources.

FREQUENCY

Quarterly.

TIMELINESS

11 to 12 weeks after the reference period.

HISTORICAL DATA

December 1988 first quarter for levels data, March 1989 first quarter for flows and adjustments.

GEOGRAPHIC BREAKDOWN

Flow of funds statistics focus on flows between each sector and other sectors of the domestic economy and/or rest of the world (non-residents as a group). However, figures for total of domestic sectors provide a measure of the total Australian domestic market for each financial instrument.

CONFIDENTIALITY AND AVAILABILITY

Data are subject to confidentiality restrictions under the *Census and Statistics Act 1905*. Most cells unlikely to be confidential.

UNPUBLISHED INFORMATION

Special Data Services are available, price on application.

The Director
National Income & Expenditure Section

Telephone: (02) 6252 6713

To purchase these statistics

Please refer to Part C — ABS Services of this Directory.

BROAD DESCRIPTION

National accounts aggregates contained in Income and Outlay and Capital Accounts.

PURPOSE OF DATA

Life insurance offices and superannuation funds are a subsector of the financial enterprises institutional sector in the Australian National Accounts.

DETAILED DESCRIPTION

Population

All life insurance offices and superannuation funds.

Superannuation data items

Income and Outlay Account and Capital Account for life insurance offices and superannuation funds. Included are details about premiums, claims, administrative costs, property income and net equity of households in life offices and superannuation funds.

SOURCE

Compiled from all available data sources, including ABS publications and data from the Insurance and Superannuation Commission.

METHOD OF COLLECTION

Analysis of all available relevant information.

FREQUENCY

Annual.

TIMELINESS

Generally about 11 months after the end of the financial year to which the data relate. It is expected that future publications/data will become available between 6 to 8 months after the reference period.

HISTORICAL DATA

Data are published for the latest 12 years.

GEOGRAPHIC BREAKDOWN

Data generally available for Australia.

CONFIDENTIALITY AND AVAILABILITY

No confidentiality restrictions apply since only aggregate data are available for the whole industry.

UNPUBLISHED INFORMATION

There are no unpublished data available.

Economy Wide Statistics

Telephone: (02) 6252 5521

To purchase these statistics

Please refer to Part C — ABS Services of this Directory.

BROAD DESCRIPTION

Profit and loss (financial) statement and balance sheet
information for all industries (excluding General Government).

PURPOSE OF DATA

To provide financial statistics, including aggregates and ratios,
based on profit and loss statements and balance sheet accounts
of businesses in all industries of the Australian economy.

DETAILED DESCRIPTION

Population

The survey frame for the Economic Activity Survey included all
survey units (i.e. management units) which operated for some
time during the financial year and were not considered to be
part of the General Government sector.

Superannuation data items

The Economic Activity Survey collects detailed income and
expenditure items and broad level asset and liability
information. Information on employer contributions to
superannuation funds is also collected across all industries

(although these data are not published). As data are only available at the subdivision level of the Australian and New Zealand Standard Industrial Classification (ANZSIC), separate data for the superannuation industry are not available (i.e. they are included with data for the insurance industry).

SOURCE

Compiled from information collected by the ABS from the Economic Activity Survey.

METHOD OF COLLECTION

The Economic Activity Survey covers over 22,000 management units. Due to the stratification used by the ABS, the number of superannuation entities covered is not known. Non-employers are excluded from the scope of the survey.

FREQUENCY

Annual.

TIMELINESS

Data becomes available within 12 months of the end of the reference period.

HISTORICAL DATA

Annual data from 1990-91 are available.

GEOGRAPHIC BREAKDOWN

Data available for Australia only.

CONFIDENTIALITY AND AVAILABILITY

Data are subject to confidentiality restrictions under the *Census and Statistics Act 1905*. Data are only available at the subdivision level of the ANZSIC. This means that superannuation statistics are included with the Insurance industry.

UNPUBLISHED INFORMATION

Unpublished data may be available on request subject to the confidentiality restrictions above and quality checks. Contact Dianne Bourke, Client Services Manager, Economy Wide Statistics on (02) 6252 5288.

PRODUCTS AND SERVICES

Name/Title of product

Managed Funds, Australia (Cat. no. 5655.0)

Dissemination media

Publication \$16.50 per issue. Also available on PCAUSSTATS.
Special Data Services are available in various formats for more detailed data. Price on application.

CONTACT

About these statistics

Mr John Carson
Assistant Director
Financial Accounts Section

Telephone: (02) 6252 7109

To purchase these statistics

Please refer to Part C — ABS Services of this Directory.

BROAD DESCRIPTION

The statistics provide a quarterly asset profile of the investments held by managed funds institutions.

PURPOSE OF DATA

Statistics provide an overall measure of the size and composition of the managed funds market in Australia. They also monitor changes in market share between the managed funds institutions.

DETAILED DESCRIPTION

Population

Life offices, ISC regulated superannuation funds, public unit trusts, friendly societies, common funds, cash management trusts and investment managers.

Superannuation data items

Total assets of superannuation funds on a consolidated basis (\$m). Type of assets held by superannuation funds on an unconsolidated basis (\$m). Type of assets include cash and deposits, loans and placements, short term securities by type of

security held and issuing institution/sector, long term securities by type of security held and issuing institution/sector, equities and units in trusts, other financial assets, non-financial assets and overseas assets.

SOURCE

Data in the publication are obtained from 3 sources; ABS Survey of Financial Information; ABS/ISC Quarterly Survey of Superannuation; and other Insurance and Superannuation Commission data sources.

METHOD OF COLLECTION

The ABS Survey of Financial Information is a mail based survey of financial and corporate trading enterprises and general government institutions. The Survey of Superannuation includes all ISC regulated superannuation funds with assets above \$10m and/or with over 500 members. ISC data sources are principally data aggregates derived from the ISC compliance database.

FREQUENCY

Data on cash management trusts are compiled and published monthly. All other data are collected on a quarterly basis.

TIMELINESS

Statistics are released approx 10 weeks after the reference period. Data on cash management trusts are also released as a Special Data Service approximately 4 weeks after the reference period.

HISTORICAL DATA

Statistics on cash management trusts are available on a monthly basis from June 1988 onwards; all other statistics are available from June 1988 quarter and every quarter thereafter.

GEOGRAPHIC BREAKDOWN

Australia only.

CONFIDENTIALITY AND AVAILABILITY

Data are subject to confidentiality restrictions under the *Census and Statistics Act 1905*.

UNPUBLISHED INFORMATION

More detailed data on financial instruments (assets) are generally available. More detailed data by type of institution are available for certain institutions e.g. public unit trusts are further classified as listed and unlisted and according to investment strategy e.g. equity trusts, mortgage trusts etc. The more detailed data are available as a Special Data Service only.

PRODUCTS AND SERVICES

Name/Title of product

1993-94 Household Expenditure Survey, Australia, Household Characteristics (Cat. no. 6531.0)

Dissemination media

Publication \$18.50 per issue and floppy disk \$18.50 per issue.

CONTACT

About these statistics

Mr Allan Etheredge
Assistant Director
Household Income and Expenditure Section

Telephone: (02) 6252 7031

To purchase these statistics

Please refer to Part C — ABS Services of this Directory.

BROAD DESCRIPTION

Household expenditure data at the finest level of detail.

PURPOSE OF DATA

Data are collected as part of the Household Expenditure Survey (HES), which provides data to update the weighting pattern of the CPI, and to provide data for research and planning purposes. For example, HES data can be used to analyse distributional characteristics of expenditure and data can be generated relating to consumer behaviour.

DETAILED DESCRIPTION

Population

Households are private dwellings and caravan parks. Hotels, boarding houses, institutions, etc. are regarded as special dwellings outside the scope of the survey.

Superannuation data items

For households with superannuation as principal source of income, for each gross income quintile: expenditure by broad expenditure group (Fuel & Power, Clothing & Footwear, Transport, Recreation etc.) and selected other payments (income tax, mortgage payment-principal, and other capital housing

costs) and household characteristics (average weekly household income, average age of reference person, average number of persons in the household, proportion of households where housing is owned outright etc.).

Note that superannuation received as a lump sum is regarded as maturity of an investment rather than income, whereas superannuation receipts received regularly and are of a recurring nature are regarded as income.

Other identifying characteristics of households can be used when requesting unpublished information, for example, number of retired persons in households and number of pension beneficiaries in households.

SOURCE

Collected by ABS as part of the Household Expenditure Survey.

METHOD OF COLLECTION

The Household Expenditure Survey covers approximately 8,400 households throughout Australia. Trained interviewers collect information on expenditure items which occur infrequently and details of income from all household members aged 15 and over. In addition, household members aged 15 and over record all payments made during a two week period in a diary provided to each of them. Consequently, each household is involved in the survey for 2 weeks, although the sample of households is spread evenly over the twelve month survey period.

FREQUENCY

Irregular.

TIMELINESS

About 18 months after the reference period.

HISTORICAL DATA

Housing Expenditure Surveys were previously conducted in 1974-75, 1975-76, 1984 and 1988-89.

GEOGRAPHIC BREAKDOWN

Australia, State, capital cities and certain other geographic areas.

CONFIDENTIALITY AND AVAILABILITY

Data are subject to confidentiality restrictions under the *Census and Statistics Act 1905*, which requires that information not be released in a manner that is likely to enable identification of a particular person or organisation.

In addition, the amount of detail which can be made available for a specific geographic area will depend on the level of standard error that is considered acceptable for the use to which the data will be put.

UNPUBLISHED INFORMATION

Confidentialised data releases include unit record data and special order tables. Prices for these services are available on request.

BROAD DESCRIPTION

Household expenditure data at the finest level of detail.

PURPOSE OF DATA

Data are collected as part of the Household Expenditure Survey (HES), which provides data to update the weighting pattern of the CPI, and to provide data for research and planning purposes. For example, HES data can be used to analyse distributional characteristics of expenditure and data can be generated relating to consumer behaviour.

DETAILED DESCRIPTION

Population

Households are private dwellings and caravan parks. Hotels, boarding houses, institutions, etc. are regarded as special dwellings outside the scope of the survey.

Superannuation data items

Average weekly household expenditure (\$) on superannuation and annuities by gross income quintile.

Average expenditure for only those households recording such expenditure is also available on request, as unpublished information.

SOURCE

Collected by ABS as part of the Household Expenditure Survey.

METHOD OF COLLECTION

The Household Expenditure Survey covers approximately 8,400 households throughout Australia. Trained interviewers collect information on expenditure items which occur infrequently and details of income from all household members aged 15 and over. In addition, household members aged 15 and over record all payments made during a two week period in a diary provided to each of them. Consequently, each household is involved in the survey for 2 weeks, although the sample of households is spread evenly over the twelve month survey period.

FREQUENCY

Irregular.

TIMELINESS

About 18 months after the reference period.

HISTORICAL DATA

Housing Expenditure Surveys were previously conducted in 1974-75, 1975-76, 1984 and 1988-89.

GEOGRAPHIC BREAKDOWN

Australia, State, capital cities and certain other geographic areas.

CONFIDENTIALITY AND AVAILABILITY

Data are subject to confidentiality restrictions under the *Census and Statistics Act 1905*, which requires that information not be released in a manner that is likely to enable identification of a particular person or organisation.

In addition, the amount of detail which can be made available for a specific geographic area will depend on the level of standard error that is considered acceptable for the use to which the data will be put.

UNPUBLISHED INFORMATION

Non-publication data releases are primarily confidentialised unit record data (on magnetic tape or floppy disk), special order tables (in hardcopy or machine readable form) for specific purpose data release (i.e. ABS processes unit record data for you). Prices for these services are available on request.

CONTACT

About these statistics

Mr Michael Jones
The Manager
Labour Force Section, Supplementary Surveys

Telephone: (02) 6252 6503

To purchase these statistics

Please refer to Part C — ABS Services of this Directory.

BROAD DESCRIPTION

Information on forms of remuneration (other than usual pay) received by employees and other conditions of their employment.

PURPOSE OF DATA

Estimates of the numbers and types of employment benefits (including superannuation) received by employees, cross-classified by demographic and labour force characteristics.

DETAILED DESCRIPTION

Population

Persons aged 15 and over employed as wage and salary earners.

Superannuation data items

Superannuation scheme membership provided by an employer as a benefit in an employee's main job. Data items may be cross-classified by gender, occupation, industry, full or part-time work, age, permanent or casual employment, weekly earnings, sector, size of location.

SOURCE

This survey is conducted by the ABS as a supplement to the Labour Force Survey.

METHOD OF COLLECTION

The Labour Force Survey is dwellings-based and covers about three-fifths of one percent of the population of Australia. The information is obtained from the occupants of selected dwellings by trained interviewers. Additional questions relating to special topics are asked of those who fall within the scope of the supplementary survey.

FREQUENCY

Irregular.

TIMELINESS

6 months after the reference period.

HISTORICAL DATA

Similar surveys were conducted in February to May 1979, and annually from August 1983 to August 1992. The last survey was conducted in August 1994. The next survey is scheduled in August 1999.

GEOGRAPHIC BREAKDOWN

Data are available for Australia, each State and Territory and for certain regions within each State.

CONFIDENTIALITY AND AVAILABILITY

Tables compiled from ABS household surveys do not enable individual respondents to be identified. As a result, a wide range of customised tables can be produced.

UNPUBLISHED INFORMATION

Unpublished tables are available on request as a Special Data Service. Contact the Assistant Director, Labour Force Section (Supplementary Surveys) on (02) 6252 6504 for an order form and to discuss your data needs. Customised tables are available on computer printout or floppy disk. Prices for the Special Data Service depend on the medium of supply and the volume of data, and are available on request.

CONTACT

About these statistics

Mr Rory Carle
Senior Manager
Labour Statistics Centre Output Group

Telephone: (08) 9360 5286

To purchase these statistics

Please refer to Part C — ABS Services of this Directory.

BROAD DESCRIPTION

Employer labour costs (including employer provided superannuation).

PURPOSE OF DATA

To provide information on the costs to employers of employing labour.

DETAILED DESCRIPTION

Population

All private and public sector employees in all States and Territories and in all industries except agriculture, forestry, fishing and hunting. Private households employing staff, and Australian permanent defence forces are also excluded.

Superannuation data items

Superannuation costs given are the total payments made by employers with respect to superannuation liabilities incurred. For the private sector these are contributions paid on a regular basis into superannuation funds. For payments, the cost of pensioner lump sum payments which are not covered by

contributions during the employees service are also included. Superannuation data are presented on the following basis: total cost, cost per employee, cost per employee covered by superannuation, cost as a percentage of major labour costs and cost as a ratio to employees covered by superannuation.

Data are available by sector, State and Territory, employer size, industry, institutional sector and level of government.

SOURCE

Data are collected by the ABS in the Survey of Major Labour Costs.

METHOD OF COLLECTION

The survey is conducted by mail covering private and public sector employer units selected from the ABS Register of Businesses. Superannuation Boards and Treasury Departments provide some information for government organisations directly to the ABS.

FREQUENCY

Between three to five years.

TIMELINESS

Twelve months after the reference period.

HISTORICAL DATA

Data are available from 1985-86 in respect of private sector. Data from 1986-87 includes the public sector.

GEOGRAPHIC BREAKDOWN

Data are available for Australia, each State and Territory.

CONFIDENTIALITY AND AVAILABILITY

Data are subject to confidentiality restrictions under the *Census and Statistics Act 1905*. Data at less aggregated levels may also have lower levels of reliability due to high sampling error.

UNPUBLISHED INFORMATION

Unpublished data are available on request, subject to the restrictions above.

BROAD DESCRIPTION

This publication presents information about the labour force status and other characteristics of persons who migrated to Australia as adults after 1970.

PURPOSE OF DATA

The information collected enables an assessment of the labour market experience of migrants.

DETAILED DESCRIPTION

Population

Data from the survey relates to persons who were not born in Australia, had arrived in Australia after 1970, were aged 18 years and over on arrival and had obtained permanent resident status.

Superannuation data items

Number of migrants who reported that superannuation is their main source of income is available.

SOURCE

This survey is conducted by the ABS as a supplement to the monthly Labour Force Survey.

METHOD OF COLLECTION

The Labour Force Survey is dwelling based and covers about three-fifths of one percent of the Australian population.

FREQUENCY

Triennially.

TIMELINESS

Data becomes available six months after the reference period.

HISTORICAL DATA

Data are available for the years 1990, 1993 and 1996.

GEOGRAPHIC BREAKDOWN

Standard labour force dissemination regions are available.

CONFIDENTIALITY AND AVAILABILITY

Data are not available where a significant level of relative standard error exists or where data are confidential.

BROAD DESCRIPTION

Details of retirement or retirement intentions of persons aged 45 and over, including main source of income, retirement scheme coverage and housing arrangements.

PURPOSE OF DATA

Comparative profile, and whether persons had retired or intended to retire from work with superannuation as the main source of income.

DETAILED DESCRIPTION

Population

Persons aged 45 and over excluding persons permanently unable to work and institutionalised persons.

Superannuation data items

For retired persons: retirement scheme membership, type of payment from retirement scheme, disbursement of lump sum payment on retirement, lump sum payments from superannuation schemes, and main source of income at retirement. For persons who intended to retire: retirement

scheme membership, expected type of payment from retirement scheme, intended disbursement of lump sum on retirement, and expected main source of income at retirement. These data items can be cross classified with status of last job, reason for early retirement, gender, age and birthplace.

SOURCE

Survey conducted by ABS as a supplement to the Labour Force Survey.

METHOD OF COLLECTION

The Labour Force Survey is dwellings-based and covers about three-fifths of one percent of the population of Australia. The information is obtained from the occupants of selected dwellings by trained interviewers. Additional questions relating to special topics are asked of those who fall within the scope of the supplementary survey.

FREQUENCY

Irregular.

TIMELINESS

7 months after the reference period.

HISTORICAL DATA

Data are available for November 1986, November 1989, November 1992. A survey will be conducted again in November 1997.

GEOGRAPHIC BREAKDOWN

Data are available for Australia, each State and Territory and for certain regions within each State.

CONFIDENTIALITY AND AVAILABILITY

Tables compiled from ABS household surveys do not enable individual respondents to be identified. As a result, a wide range of customised tables can be produced.

About these statistics

Ms Kirrilie Horswill
The Manager
Labour Force Section, Supplementary Surveys

Telephone: (02) 6252 7204

To purchase these statistics

Please refer to Part C — ABS Services of this Directory.

BROAD DESCRIPTION

Provides information on the number and characteristics of persons covered by superannuation schemes.

PURPOSE OF DATA

Provides details of persons who currently belong to a superannuation scheme, some details of persons who once belonged to a superannuation scheme and the relationship between superannuation and the age pension.

DETAILED DESCRIPTION

Population

Civilian persons aged 15–74, excluding institutionalised persons and persons aged between 15 and 20 still at school. More detail on superannuation was collected from persons aged 45–74 than from those aged 15–44. Persons aged 15–44 were only asked superannuation questions relating to coverage and the number of accounts held.

Superannuation data items

Whether covered by a superannuation scheme — Details about type of contributions (personal and/or by employer/business); number of accounts; provider of scheme; time in scheme;

weekly contribution; proportion of earnings contributed; whether compulsory to personally contribute; whether contributing more than required; reason not contributing personally, eligibility to contribute; expected payments and intended disbursement from scheme.

Previous superannuation coverage — Type of coverage, number of accounts with preserved benefits, time in scheme, type of payments received, disbursement and amount of lump sum received.

Preserved Benefits — Whether preserved funds for future use, expected type of payment and intended disbursement.

Other details — Current main source of income, expected main source of income when ceased full-time work and main source of income when ceased full-time work. Usual gross weekly pay, occupation, industry, sector, trade union membership, permanent/casual status and socio-demographic information.

SOURCE

This survey is conducted by ABS as a supplement to the Labour Force Survey.

METHOD OF COLLECTION

The Labour Force Survey is dwellings-based and covers about three-fifths of one percent of the population of Australia. The information is obtained from the occupants of selected dwellings by trained interviewers. Additional questions relating to special topics are asked of those who fall within the scope of the supplementary survey.

FREQUENCY

Irregular.

TIMELINESS

Data are available 5 months after the reference period.

HISTORICAL DATA

Similar surveys were conducted in February 1974, September to November 1982, November 1988, November 1991 and November 1993.

GEOGRAPHIC BREAKDOWN

Data are available for Australia, each State and Territory and for certain regions within each state.

CONFIDENTIALITY AND AVAILABILITY

Tables compiled from ABS household surveys do not enable individual respondents to be identified. As a result, a wide range of customised tables can be produced.

Survey of Superannuation Fund Performance (Report on the 1997 AIST/CMSF)

Dissemination media

Publication \$250.00 per issue.

CONTACT

About these statistics and to purchase these statistics

Ms Ros Bennett
Membership Officer

Telephone: (03) 9602 4511

BROAD DESCRIPTION

The report provides summaries of the overall range of investment returns and crediting rates for all funds and for various sectors of funds averaged over the three years 1993-94 to 1995-96 and actual investment returns and crediting rates for each of the three years to the last financial year 1995-96.

PURPOSE OF DATA

These data were compiled in response to demands from AIST members for a survey which allows their funds performance to be compared against other comparable funds.

DETAILED DESCRIPTION

Population

34 Corporate Funds, 37 Industry Funds and 17 Public Sector Funds.

Superannuation data items

- Annual returns in the 3 years (1993-96) — all funds.
- Average returns & average crediting rate by allocation to growth assets for 3 years (1993-96).
- Average returns and average crediting rate by allocation to growth assets (1993-94, 1994-95, 1995-96).

- Returns, crediting rate and allocation to growth assets by benefit type (hybrid, accumulation, defined) average 3 years (1993-96) and 1993-94, 1994-95 and 1995-96.
- Returns, credit rate & allocation to growth assets by fund type (Industry Corporate, Public Sector) average 3 years (1993-96) and 1993-94, 1994-95 and 1995-96.
- Returns by size of fund (assets) average 3 years (1993-96) and 1993-94, 1994-95, and 1995-96. Asset breakdown available for funds with assets of \$1m-\$100m, \$100m-\$500m, \$500m- \$1b and \$1b- \$2b.

SOURCE

Data are collected solely by AIST.

METHOD OF COLLECTION

All members of AIST; approximately 800 members of those 350 funds. Initial sample size of 20. The information was collected via a survey prepared by AIST.

FREQUENCY

Annual.

TIMELINESS

Collected in December and distributed in April.

HISTORICAL DATA

Data are available from 1993-94.

GEOGRAPHIC BREAKDOWN

Australia. The information is not broken down by State. However data was sought from AIST members in all Australian States.

CONFIDENTIALITY AND AVAILABILITY

The name of the participating funds is confidential. Each fund was provided with a unique identifier number which is not available to other funds.

UNPUBLISHED INFORMATION

Not available.

Ms Nicole Leon
Administration Manager

Telephone: (02) 9221 0007

BROAD DESCRIPTION

A six monthly survey of funds managed by AIMA members listing source of funds and giving figures for assets in which funds are invested.

PURPOSE OF DATA

The statistics are compiled to provide a picture of the activities of AIMA's members and to improve the level of publicly available information about the investment management industry in Australia.

DETAILED DESCRIPTION

Population

Investment management firms who are members of AIMA.

Superannuation data items

Market Overview:

- Sources of funds under management
- Funds under advice
- Distribution of total funds under management
- Allocation of assets under management
- Allocation of assets under management by fund type.

Market Concentration. Detailed tables of sources and allocation of funds for:

- Life funds superannuation (including ADF's)
- Retail unit trust funds
- General insurance funds
- Other wholesale funds
- Other retail funds
- Funds under advice — market overview
- Data recorded in billion dollar (or part thereof) units.

SOURCE

Data are collected directly by AIMA and analysed by an independent research group.

METHOD OF COLLECTION

Questionnaires are sent to all AIMA members for completion. Questionnaires consist of a series of tables completed manually. Responses are normally received from all but three or four members. Membership is approximately 61 members.

FREQUENCY

Six monthly.

TIMELINESS

6–8 weeks after the reference period.

HISTORICAL DATA

June 1993, December 1993, June 1994, December 1994, June 1995, December 1995, June 1996 and December 1996.

Dissemination media

This report is available as a publication or via email and is complimentary.

CONTACT

About these statistics and to purchase these statistics

Ms Jane Atkinson
Executive Secretary

Telephone: (02) 9251 5099

BROAD DESCRIPTION

A quarterly survey which examines sales over the past three and 12 months across all classes of retirement income streams, the size of the market, the average purchase price of each type of retirement income stream and other trend data.

PURPOSE OF DATA

The statistics provide valuable information about the retirement income streams market.

DETAILED DESCRIPTION

Population

The report examines per person sales of retirement income streams through providers such as superannuation funds, life offices, banks and fund managers.

Superannuation data items

Funds under management, gross sales as a percent (in \$m and \$b) across Retirement Income Streams, by ETP and Non-ETP money sales.

SOURCE

Statistics are compiled by actuarial firm Simon Solomon & Associates.

METHOD OF COLLECTION

As above.

FREQUENCY

Quarterly.

TIMELINESS

6 weeks after the end of each quarter.

HISTORICAL DATA

June 1996, September 1996, December 1996 and March 1997.

BROAD DESCRIPTION

Information obtained from income tax returns.

PURPOSE OF DATA

To provide information in respect of itemised information
obtained from income tax returns.

DETAILED DESCRIPTION

Population

Statistics are obtained from income tax returns and assessments
processed in the 12 months following the end of the income
year.

Superannuation data items

Details of number of taxpayers with (i) Australian Government
pensions and other benefits, (ii) other pensions, superannuation
etc, and amounts received by grade of taxable income. Data
items are recorded in million dollar units.

SOURCE

Australian Taxation Office income tax returns of individuals.

METHOD OF COLLECTION

Information obtained from all income tax returns and assessments processed in the 12 months following the end of the income year.

FREQUENCY

Annual.

TIMELINESS

Generally published October each year (i.e. approximately 18 months after the end of the income year to which the income tax returns relate).

HISTORICAL DATA

Data are available from 1976-77 income year for individuals. Note that if detailed data for a particular year are required it is necessary to refer to the appropriate edition of Taxation Statistics.

GEOGRAPHIC BREAKDOWN

Data are available for Australia.

CONFIDENTIALITY AND AVAILABILITY

Data are subject to confidentiality restrictions under the secrecy provisions of the *Income Tax Assessment Act 1936*.

UNPUBLISHED INFORMATION

Generally, all data available, subject to the confidentiality restrictions above, are published.

BROAD DESCRIPTION

Information obtained from income tax returns.

PURPOSE OF DATA

To provide information in respect of itemised information
obtained from income tax returns.

DETAILED DESCRIPTION

Population

Statistics are obtained from income tax returns and assessments
processed in the 12 months following the end of the income
year.

Superannuation data items

Separate statistics are provided for eligible termination payments
which are 5 per cent assessable, those taxable at concessional
rates and those taxable at other rates. Data are provided by grade
of taxable income, number of taxpayers with the item in million
dollar units.

SOURCE

Income tax returns of individuals.

METHOD OF COLLECTION

Information obtained from all income tax returns and assessments processed in the 12 months following the end of the income year.

FREQUENCY

Annual.

TIMELINESS

Generally published October each year; that is about 18 months after the end of the income year to which the income tax returns relate.

HISTORICAL DATA

Data are available from 1983-84 income year onwards. Note that if detailed data for a particular year are required it is necessary to refer to the appropriate edition of Taxation Statistics.

GEOGRAPHIC BREAKDOWN

Data are available for Australia.

CONFIDENTIALITY AND AVAILABILITY

Data are subject to confidentiality restrictions under the secrecy provisions of the *Income Tax Assessment Act 1936*.

UNPUBLISHED INFORMATION

Generally all data available subject to the confidentiality restrictions above are published.

Dissemination media

Publication. Price on application.

CONTACT

About these statistics and to purchase these statistics

Ms Ingrid Selene
Regional Director
Strategic Resources

Telephone: (02) 9929 4955

BROAD DESCRIPTION

Census of life insurers and fund managers that measures financial product sales and sales personnel during the financial year 1995-96 by type of product and distribution channel used.

PURPOSE OF DATA

To provide baseline statistics on industry sales and distribution channel structure. The census will be repeated at regular intervals to track trends.

DETAILED DESCRIPTION

Population

Life insurance companies, investment managers, bank assurances and friendly societies.

Superannuation data items

- Amount of contributions from new business sales (\$m) by type of product.
- Amounts of all contributions from new and existing business (\$m) by type of product.
- Type of adviser/distribution channel through which new business sales were made by type of product.

SOURCE

Questionnaires designed by LIMRA and distributed by financial service industry associations.

METHOD OF COLLECTION

Completed questionnaires received from 34 companies which represent 80% of the ISC-regulated single contribution business, 90% of the ISC-regulated regular contribution business, 50% of all IFA companies and 20% of assets held by friendly societies.

FREQUENCY

Expected to be annually.

TIMELINESS

Future reports will cover the calendar (not financial) year. Results are available four to six months after the reference period.

HISTORICAL DATA

The 1995-96 study was the first in what will be an annual survey.

GEOGRAPHIC BREAKDOWN

Australia.

CONFIDENTIALITY AND AVAILABILITY

Full report generally only available to participating companies. Summary statistics may be made available to other organisations on request. Data on individual companies not available due to confidentiality restrictions.

Telephone: (03) 9654 4266

BROAD DESCRIPTION

Primary research of fund managers budget retail super product providers. Secondary research of schedules and company records. Consumer research of retail super products' attribute importance by company.

PURPOSE OF DATA

As base for industry intelligence and industry and competitor viability assessment and forecasts.

DETAILED DESCRIPTION

Population

Superannuation fund managers, including the managers of the superannuation funds of the top 100 companies, managers representing 95 percent of public sector superannuation funds and managers of all major institutional funds.

Superannuation data items

This report provides an analysis of the superannuation industry and selected retail superannuation products (e.g. Master Trusts, Super Bonds, Super Plans and DIY super). It also provides extensive product distribution and performance, market share analysis including forecasts for future growth.

SOURCE

Major reliance is placed on primary research undertaken by Mintel. Secondary research and international research are also used.

METHOD OF COLLECTION

Several methodologies are used. These include superannuation traces; telephone product attribute survey; delphi studies of industry participants; field collections of fund manager and planner sales patterns. In addition, 95% of the public sector population are interviewed and 100 companies are canvassed to represent the corporate sector.

FREQUENCY

Annual.

TIMELINESS

12 months after the reference period.

HISTORICAL DATA

Data are available since 1981.

GEOGRAPHIC BREAKDOWN

Australia; selected analysis by region.

CONFIDENTIALITY AND AVAILABILITY

Readily available on subscription.

UNPUBLISHED INFORMATION

Access to raw data can be obtained. Price on application.

Managing Director

Telephone: (03) 9807 7482

BROAD DESCRIPTION

Data on immediate annuities.

PURPOSE OF DATA

Statistics are used as a reference manual for examining the different products sold by Australian Life Insurance companies and monitoring sale of immediate annuities each quarter.

DETAILED DESCRIPTION

Population

Immediate annuity products and quarterly sales of business by number of cases and dollar amounts. Total market covered.

Superannuation data items

Compilation of Australian immediate annuity products and quarterly sales by company (million dollar units).

SOURCE

Collected directly by Simon Solomon & Associates.

METHOD OF COLLECTION

Complete enumeration.

FREQUENCY

Quarterly.

TIMELINESS

Within three months of the reference period.

HISTORICAL DATA

Data available from 1989 to 1997 inclusive.

GEOGRAPHIC BREAKDOWN

Australia.

CONFIDENTIALITY AND AVAILABILITY

Not applicable.

UNPUBLISHED INFORMATION

Specific reports and analyses available on request. It is expected that future publications will also be available on CD-Rom and disk.

CONTACT

About these statistics and to purchase these statistics

Mr Christopher Page
Chief Executive

Telephone: (02) 9290 3488

BROAD DESCRIPTION

A database providing comprehensive information on over 2,190 superannuation funds, 68 Government non-superannuation funds and over 420 wholesale investment consultants. Rainmaker also includes information on over 800 investment managers, charities, foundations and institutions.

PURPOSE OF DATA

On an interactive basis, the database allows information to be used to perform analysis of the superannuation and investment management industries. The database can be used by both investment managers and superannuation funds to gain a better understanding of individual funds as well as market trends, size and growth. In addition, superannuation funds can use the database to develop benchmarks.

DETAILED DESCRIPTION

Population

Superannuation funds across all industries, investment managers, institutions and consultants.

Superannuation data items

Fund size, account status reports (including fund mandates and assets held), key contact reports, specialised reports and press files.

SOURCE

Data collection is on a systematic basis, sourced from both primary and secondary sources. This includes meetings on a one to one basis for accounts over \$100 million, collection of annual reports, market surveys as well as other secondary sources.

METHOD OF COLLECTION

Several methodologies used.

FREQUENCY

Ongoing.

TIMELINESS

Electronic updates are provided to clients every two months.

HISTORICAL DATA

Available on various accounts up to ten years.

GEOGRAPHIC BREAKDOWN

Australia and all States and Territories.

CONFIDENTIALITY AND AVAILABILITY

Not applicable.

UNPUBLISHED INFORMATION

Specialised reports can be produced for clients on request. Price on application.

Ms Linda Drake
Editor
Super Review

Telephone: (02) 9318 4711

BROAD DESCRIPTION

Monthly publication dedicated to wholesale super industry with regular news, views and round-up of products, providers, conferences, seminars etc.; regular surveys and listings of various specialist service providers to wholesale super industry, e.g. fund managers, industry funds, insurers, administrators, software services.

PURPOSE OF DATA

For information/education of trustees and secretaries of super funds.

DETAILED DESCRIPTION

Population

Various sources; see Broad Description.

Superannuation data items

Information varies according to nature of listing, but generally consists of name of firm, address and phone number, contact name and description of services/products.

SOURCE

Data are generally collected directly.

METHOD OF COLLECTION

Generally collected by questionnaire directed to the source. Aim to cover 95–100% of the particular market or sub sector thereof.

FREQUENCY

Most surveys/listings are conducted annually.

TIMELINESS

Approximately 2 months after the reference period.

HISTORICAL DATA

Only to the extent of existence or otherwise of backnumbers.

GEOGRAPHIC BREAKDOWN

Australia wide.

CONFIDENTIALITY AND AVAILABILITY

Respondents implicitly agree to publication by responding.

BROAD DESCRIPTION

Various reports analyse market share of life insurance companies, asset allocation of life insurance statutory funds and comparison of products available to the public (personal superannuation, superannuation master trusts, group insurance, annuities and pensions).

PURPOSE OF DATA

Specialist research targeted towards practitioners in each field.

DETAILED DESCRIPTION

Population

All life insurance companies which submit a return to the Insurance and Superannuation Commission. Major fund managers offering specified products to the public (personal superannuation, superannuation master trusts, annuities and pensions).

Superannuation data items

- *Analysis and Analysis by State* contain details of market share of life insurance companies, premium income (annual premium and single premium basis), asset size and number of funds, at the national level and state level in the respective publications.
- *Asset Analysis* contains details of asset allocations of statutory funds of life insurance companies.
- *Master Trust Analysis* contains details of 75 master trust products, being all those issued by life insurance companies and the major master trusts issued by prospectus. The survey provides analysis on a product by product basis, comparison of fees and charges, market share analysis and overview of the market as a whole.
- *Group Insurance Analysis* contains details of 19 group life products, 15 salary continuance products and 8 group trauma products, being all those issued by life insurance companies and the major group life products issued by prospectus. The survey provides analysis on a product by product basis, comparison of fees and charges, market share analysis and overview of the market as a whole.
- *Personal Super Analysts* contains details of 80 personal superannuation products (including rollovers), being all those issued by life insurance companies and the major personal superannuation products issued by prospectus. The survey provides analysis on a product by product basis, comparison of fees and charges, market share analysis and overview of the market as a whole.
- *Annuity and Pension Analysis* contains details of 93 immediate annuity and allocated pension products, being all those issued by life insurance companies and the major products issued by prospectus. The survey provides analysis on a product by product basis, comparison of fees and charges, market share analysis and overview of the market as a whole.

- *Personal Super League Table & Annuity League Table* provide data on fund size and cash flow as well as investment performance over 1,2,3 and 5 years.
- *The Annuity & Pension League Table* contains data on immediate annuities and allocated pensions. These reports are the ideal quick reference guide to investment performance for retail single premium, superannuation and retirement incomes products.

SOURCE

Source material includes the Insurance and Superannuation Commission statistics, policy documents, prospectuses and responses to questionnaires.

METHOD OF COLLECTION

Data are collected from several sources. Statistical publications and product surveys all contain information about the whole market. Samples are not used.

FREQUENCY

Quarterly or annually (varies by publication).

TIMELINESS

Material is issued approximately four months after the reference period.

HISTORICAL DATA

Varies by product but some data are available for an eight-year period.

GEOGRAPHIC BREAKDOWN

This information is provided when known at State and Territory level.

CONFIDENTIALITY AND AVAILABILITY

Readily available on subscription.

UNPUBLISHED INFORMATION

Unpublished data can be made available on a fee for service basis. Price on application.

PRODUCTS AND SERVICES

Name/Title of product

William M Mercer Pooled Funds Survey

Dissemination media

Publication \$300.00 pa. This is also available on floppy disk and as a software package. Prices for these two products are available on application.

CONTACT

About these statistics and to purchase these statistics

Ms Betty Ryan
Investment Analyst
Investment Consulting

Telephone: (03) 9245 5597

BROAD DESCRIPTION

Investment returns of pooled superannuation funds.

PURPOSE OF DATA

Used for monitoring performance of fund managers.

DETAILED DESCRIPTION

Population

41 fund managers are included in the survey. The managers included are those involved in the wholesale segment of the superannuation industry.

Superannuation data items

The data are investment returns (net of tax and fees) achieved by each manager included in the table over four periods being 3 months, 1 year, 3 year and 5 year.

SOURCE

Source data (in terms of unit prices) are collected directly from fund managers.

METHOD OF COLLECTION

Unit prices are sent to William M Mercer at the end of each month by fund managers included in the survey. The survey covers all significant fund managers in the industry.

FREQUENCY

Monthly.

TIMELINESS

Results are available approximately 10 days after the end of the survey month.

HISTORICAL DATA

Data are available from January 1971.

GEOGRAPHIC BREAKDOWN

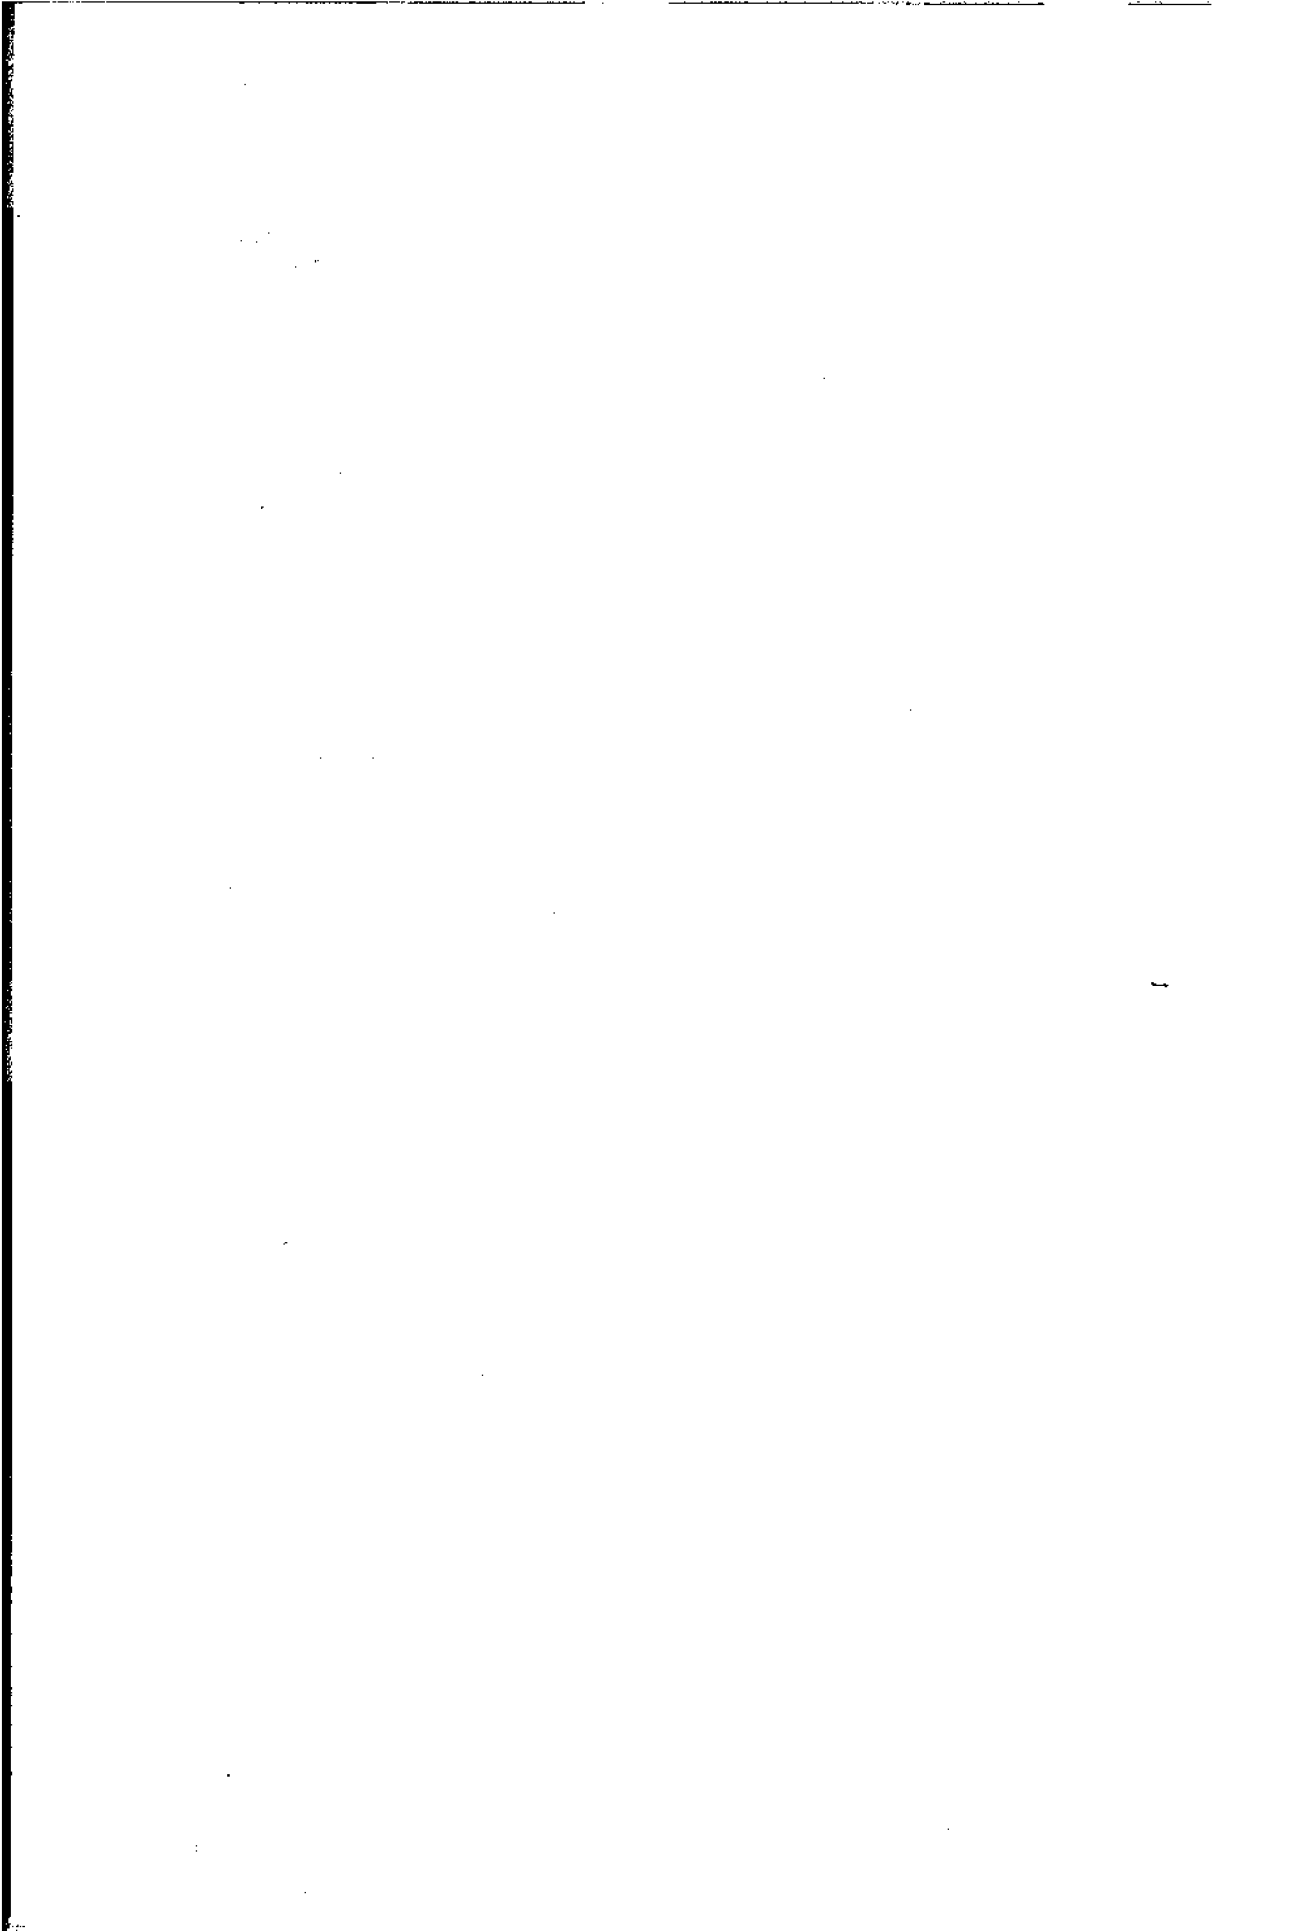

Australia only.

CONFIDENTIALITY AND AVAILABILITY

Not applicable. The Mercer Pooled Fund Survey is published in the Business Review Weekly every month.

UNPUBLISHED INFORMATION

Additional information is available on request.

PART C ABS Services

ABS SERVICES

The Australian Bureau of Statistics (ABS) is Australia's national statistical authority. It collects and disseminates information on a wide range of economic, social and demographic topics for Australia, its States and Territories.

Whether a small business owner, a marketing manager in a large corporation, a policy maker, a student, or whatever your interest, the ABS provides a range of information services designed to deliver statistical information to you. These include:

- information consultancy service
- subscriptions
- ABS bookshops
- electronic products and services
- ABS statistics on the Internet
- library access to ABS information
- statistical consultancy service.

INFORMATION CONSULTANCY SERVICE

To satisfy your information needs, the ABS provides an information consultancy service on a fee-for-service basis, ranging from a simple information inquiry to specialised in-depth data investigations. Information may be provided in the format of your choice, and may include a hard copy report, (which can be mailed or faxed), computer diskette or compact disk.

ABS publications can contain only a fraction of the available data.

SUBSCRIPTIONS

If you want access to ABS publications on a regular basis, the ABS subscription service is the solution. With a subscription, you receive your choice of publications directly through the mail.

To subscribe to ABS publications, you order in advance on an annual basis. You can amend your subscription at any time and include new products as they become available. You may also subscribe to on-line services or a range of special non-publication data services.

For more information about the ABS subscription service:

Mail: ABS Subscription Services
GPO Box 2796 Y
MELBOURNE VIC 3001 AUSTRALIA

Free call: 1300 366 323
Facsimile: (03) 9615 7848

ABS BOOKSHOPS

ABS bookshops, located in ABS offices in each capital city, sell all publications released by the ABS which are currently in print.

If you are interested in purchasing a publication, you may visit an ABS bookshop in person or you may phone or fax to order a publication using your Bankcard, Visa, Mastercard or American Express credit card.

ELECTRONIC PRODUCTS AND SERVICES

In addition to printed publications you can access a wide range of statistical information through various electronic media, giving you instant access to a wide variety of information and the power to analyse and sort data with your personal computer.

You can obtain access to over 40,000 time series through the on-line PC-AUSSTATS service.

To find out more about the range of electronic data services available contact Information Consultancy Services in any of our offices.

THE INTERNET

Basic ABS statistics are also available to the public via the Internet. The ABS StatSite contains ABS data across a range of subjects, including key economic indicators and also includes a full address list of Library Extension Program (LEP) libraries across Australia.

The ABS StatSite address is: <http://www.abs.gov.au>.

University students — providing that your university is a subscriber, you can obtain a more extensive range of ABS data via the Internet — the ABS Time Series Service. Your university librarian should be contacted for assistance.

LIBRARY ACCESS TO ABS INFORMATION

If you wish to access ABS statistical information, you can do so at any ABS office library. ABS office libraries are available for public reference, generally by appointment only (please contact your local ABS office for further information). These operate on a 'self-help' basis. However ABS librarians are able to facilitate fee-based information consultancies for clients.

ABS statistical information is also available to the community through the libraries participation in the LEP via public, State, TAFE and university libraries. Staff in these libraries have received training in the use of ABS information and are able to meet many information needs of the general community. Many school libraries also hold ABS publications.

STATISTICAL CONSULTANCY SERVICE

The ABS also offers a specialised statistical consultancy service to clients.

SUBMISSIONS FOR FUTURE INCLUSIONS IN THIS DIRECTORY

The Australian Bureau of Statistics, as Australia's primary statistical agency, has a responsibility to promote the coordination of statistical collections which are undertaken by various organisations throughout Australia. This Directory was introduced to provide comprehensive coverage of sources of superannuation related statistics produced by such organisations. It is possible that certain data sources have been excluded from this Directory.

If your organisation, or an organisation that readers are aware of, collect and produce statistics on superannuation and have not already appeared in this Directory, for future inclusion, please contact Roberta Millucci on (02) 6252 7115 or complete the following details and return this form to:

The Director
Financial Accounts Section (Wing 6GB)
The Australian Bureau of Statistics
PO Box 10
Belconnen ACT 2616
AUSTRALIA

Name of Organisation

Address

Telephone Number

Facsimile Number

Contact Name

Please provide a broad description of the superannuation statistics collected by the organisation relating to the Australian superannuation industry.
